GOAL video: Breaking down farmed shrimp certification standards

3 January 2017

By Global Aquaculture Advocate

Michael Tlusty: Differentiated schemes drive continual improvement

Michael Tlusty, director of ocean sustainability science at the New England Aquarium and the School for the Environment at the University of Massachusetts at Boston, presented “Assessing the Breadth and Depth of Shrimp Aquaculture Certification Schemes” at the Global Aquaculture Alliance’s GOAL 2016 conference in Guangzhou, China, on Sept. 22, 2016.

There are similarities and differences between the various aquaculture certification programs – Best Aquaculture Practices, Aquaculture Stewardship Council, GlobalGAP, etc. – but until recently there has been little publicly available analysis to document those points.

Michael Tlusty, director of ocean sustainability science at the New England Aquarium and the School for the Environment at the University of Massachusetts at Boston, presented “Assessing the Breadth and Depth of Shrimp Aquaculture Certification Schemes” at the Global Aquaculture Alliance’s GOAL 2016 conference in Guangzhou, China, on Sept. 22, 2016.

In his presentation, Tlusty shared findings from several years of analysis focused on shrimp farming, and then addressed the roadmap toward increasing the sustainability of aquaculture production.

GOAL 2016: Michael Tlusty

To maximize the viewing of this 12-minute video, here are the slides used in his presentation.
